To Whom It May Concern,

It is a genuine pleasure to recommend Jeff Peterson. I have been the Construction Manager at Mount Holyoke College for the past 23 years and in the recent past have worked with Jeff in his capacity as the architect on the Mount Holyoke College Community Boathouse.

From the outset, Jeff listened to us as we described our dream of building a boathouse, understood our goals and financial restraints, worked with us to refine scope and budgets, remained patient as the governmental agencies slowly churned out the various and sundry permits, and at the end of the day Jeff produced a great boathouse. During the construction process, Jeff dealt with issues in the most professional manner. In all my years in the business, I can't think of another architect who better handled the Owner-Architect- Builder dynamic than Jeff. He was the master. We love the design. This terrific building is just what we wanted—not over done; not under done. Very functional, very appealing.

I could continue on with more glowing accounts but instead with simply say that I think the world of him and respect him greatly.

I would without any reservation recommend Jeff to you.
